RA SYSTEM

design Gianfranco Marabese, 2024

RA è una collezione innovativa: nell'utilizzo personalizzato della luce e nell'essenzialità del disegno. Ispirata all'antico dio egizio, da cui prende il nome, RA incorpora la potenza e la maestosità del sole, fondendo design e mitologia.

Sottili segmenti di luce disposti a raggiera e incastonati in cerchi perfetti, danno forma alla lampada. La facilità di rotazione dei segmenti luminosi indipendenti tra loro permette di modulare e direzionare l'illuminazione, secondo le esigenze specifiche dell'utente: per creare atmosfere e scenografie esclusive.

RA is an innovative collection: in the personalized use of light and 'essentiality of design. Inspired by the ancient Egyptian god from whom it takes its name, RA incorporates the power and majesty of the sun, blending design and mythology.

Thin segments of light arranged in rays and set in perfect circles give shape to the lamp. The easy rotation of the independent light segments allows the lighting to be modulated and directed according to the specific needs of the user: to create exclusive atmospheres and settings. RA is an innovative collection: in the personalized use of light and 'essentiality of design.

L'innovativa tecnologia costruttiva di RA permette alla collezione di offrire
a soluzioni inedite per forma e numero di segmenti luminosi, che

*RA's innovative construction technology allows the collection to offer
terms of shape and number of light segments, which change the*

di espandersi in molteplici tipologie e dimensioni fino ad arrivare
cambiano configurazione e utilizzo della luce stessa.

*expand in multiple types and sizes to unprecedented solutions in
configuration and use of the light itself.*
